

## **Remarks**

### Status of application

Claims 1-61 were examined and stand finally rejected in view of prior art as well as for technical reasons. Applicant has filed a Notice of Appeal to appeal the rejection of Applicant's claims made in the final rejection. However, Applicant requests entry of the amendments to the specification made in this Amendment After Final to address non-art objections to the specification made in the Final Rejection.

### General

#### A. Objections to the Specification

Applicant appreciates the courtesy of a telephone discussion with the Examiner on February 9, 2009 to discuss the Examiner's objections to Applicant's specification as containing hyperlinks. Although Applicant continues to respectfully disagree with the Examiner's position that Applicant's specification contains "hyperlinks" as defined in MPEP § 608.01, in an effort to further prosecution and remove issues for appeal Applicant has amended paragraphs [0014], [0034], [0036] and [0042] of Applicant's specification to remove any references to URLs so as to address the Examiner's objection. Applicant therefore respectfully requests the Examiner to enter the foregoing amendments, so as to resolve the Examiner's objection to Applicant's specification.

If for any reason the Examiner feels that a telephone conference would in any way expedite prosecution of the subject application, the Examiner is invited to telephone the undersigned at 925 465 0361.

Respectfully submitted,

Date: February 9, 2009
